

**Dimension 3D printing can help you quickly fine tune designs and cut weeks, even months, from your development schedule. Now you can test form, fit and function and explore as many design iterations as you like — over your network, right from your desktop.**

**For more information on Dimension 3D printers contact 3DVision Technologies at 513-745-2700 or email us at [info@3dvision.com](mailto:info@3dvision.com)**

## Available Printers

### Dimension BST (Breakaway Support Technology) Printer

The Dimension BST is the lowest-priced office-friendly machine of its kind. Incorporating the same technology as the Dimension SST, the BST produces high-quality ABS models. The difference is that the BST features a manual support removal process where the designer removes the model from the system and breaks the support away by hand.

#### Dimension BST 1200es

254x254x305mm  
10x10x12" Build Size  
Featuring ABSplus Material  
\$18,900\*

### Dimension SST (Soluble Support Technology) Printer

The SST incorporates the same technology as the BST, the difference is that the SST features an automated support removal process. The designer simply removes the model from the system into an SST Station. The SST Station is an agitation system that utilizes hot water and a soap bath to automatically wash away the support structures. Essentially, the SST allows for "hands free" printing.

#### Dimension SST 1200es

254x254x305mm  
10x10x12" Build Size  
Featuring ABSplus Material  
\$32,900\*

### Dimension Elite Printer

The Dimension Elite printer provides engineers and designers with stronger, functional models with finer feature detail and improved surface finish. Using ABSplus material, the models are on average 40 percent stronger than standard ABS models making it ideally suited for testing the form, fit and function of inherently fragile, finely detailed models.

#### Dimension Elite 3D Printer

203x203x305mm  
8x8x12" Build Size  
Featuring ABSplus Material  
\$29,900\*

### Dimension uPrint Personal 3D Printer

The uPrint builds models with ABSplus making it ideally suited for testing the form, fit and function of models and prototypes. uPrint also features a soluble support removal system, allowing for hands-free removal of the model support material. As a personal 3D printer, uPrint makes 3D printing immediate and convenient. There's no waiting in queue for a shared printer and no waiting for models to arrive from an outside service.

#### uPrint Personal 3D Printer

103x152x152mm  
8x6x6" Build Size  
Featuring ABSplus Material  
\$14,900\*

### 3DVision Technologies Office Locations

#### Cincinnati

11500 Northlake Drive  
Suite 122  
Cincinnati, Ohio 45249  
513.745.2700 ph

#### Cleveland

30575 Bainbridge Road  
Suite 110  
Solon, Ohio 44139  
440.425.0114 ph

#### Columbus

8760 Orion Place  
Columbus, Ohio 43240  
740.549.4109 ph

#### Dayton

6450 Poe Ave, Suite 108  
Dayton, Ohio 45414  
937.558.2279 ph

#### Indianapolis

9449 Priority Way  
West Drive, Suite 222  
Indianapolis, IN 46240  
317.536.5909 ph

#### Louisville

10503 Timberwood Circle  
Suite 112  
Louisville, KY 40223  
502.212.5171 ph

#### Toledo

135 Chesterfield Lane  
Suite 203  
Maumee, Ohio 43537  
419.517.6513 ph
